## Annotations

[New Run](#)[Run History](#)

## Evaluation

[New Evaluation](#)[Compare](#)

## Step 1: Select Table

Choose a table to annotate

[School building data \(4 columns\)](#)

## Step 3: Select Columns

4 columns selected

[Select All](#)[Clear](#) Month Usage [kWh] Cost (net in PLN) Cost (gross in PLN)

## Step 2: Select Ontology

Choose an ontology for annotation

[BEO.rdf \(602 classes\)](#)

## Step 4: Configuration

Set annotation parameters

### Decision Mode

[Single](#)[EDM](#)

Single agent makes decisions

### Prompt Type

[Direct](#)[CoT](#)

Chain-of-thought reasoning before answer

### Max Depth

[3](#)

Maximum ontology hierarchy depth

### Sample Rows (k)

[5](#)

Number of table rows to include

[Cancel](#)[Start Annotation](#)
